

Check Point Certified Security Administrator R80 (CCSA-R80)

ID CP-CCSA-R80 Price £ 1,795.- (excl. VAT) Duration 3 days

Test and Certification

Prepare for the CCSA Exam 156-215.80 at [Pearson VUE CheckPoint](#)

Who should attend

Technical professionals who support, install, deploy or administer Check Point Software Blades.

Prerequisites

Prior to taking this course, it is recommended that you possess the following:

- General knowledge of TCP/IP
- Working knowledge of Windows and/or UNIX, network technology and the Internet

Course Objectives

At the end of the course, you will be able to:

- Describe the key elements of Check Point's unified, secure management architecture
- Interpret the concept of a firewall and understand the mechanisms used for controlling network traffic
- Recognize SmartConsole features and functions
- Understand Check Point deployment options
- Describe the basic functions of the Gaia OS
- Describe the elements of a unified security policy
- Understand how traffic inspection takes place in a unified security policy
- Summarize how administration roles and permissions assist in managing policy
- Implement Check Point backup techniques
- Recognize Check Point Security Solutions and Products and how they work to protect your network
- Understand licensing and contract requirements for Check Point security products
- Identify tools designed to monitor data, determine threats and recognize opportunities for performance improvements
- Identify tools designed to respond quickly and efficiently to changes in gateways, tunnels, remote users and

traffic flow patterns or security activities

- Understand Site-to-Site and Remote Access VPN deployments and VPN communities
- Understand how to analyze and interpret VPN tunnel traffic
- Recognize how to define users and user groups
- Manage user access for internal and external users
- Understand the basic concepts of ClusterXL technology and its advantages
- Understand how to perform periodic administrator tasks as specified in administrator job descriptions

Course Content

Today, managing security is a complex endeavor, making it more important to consolidate. With R80 management, security consolidation is fully realized. This three-day course covers everything you need to start-up, configure and manage the daily operations of your Check Point infrastructure with R80.

Detailed Course Outline
